

while Example

Annual, Monthly, Weekly Pay

- Assuming that line input & output code has been provided (see over)
- Code both the while & switch statements to perform the required calculations
 - Sentinel → 9999
 - Switching on payType char → W / M / A
- **Inputs:** empNo(int), name(String), payType(char), amount(double)
- **Outputs:**
 - empNo, name, payType, weekPay, monthPay, annualPay

Annual, Monthly, Weekly Pay
